THE VOICE OF EUROPEAN HVAC DESIGNERS AND BUILDING SERVICES ENGINEERS

REHVA, the Federation of European HVAC Associations, represents more than 120.000 building services engineers from 27 countries. REHVA is dedicated to the improvement of health, comfort and energy efficiency in all buildings and communities, acting as the voice of the European building services engineers.

REHVA provides a platform for international networking, cooperation and knowledge exchange, contributes to technical and professional development and follows EU policy developments.

REHVA cooperates with partner associations beyond Europe to promote European Standards, engineering knowledge and European HVAC products globally.

REHVA MEDIA KIT 2019 PROMOTIONAL SERVICES

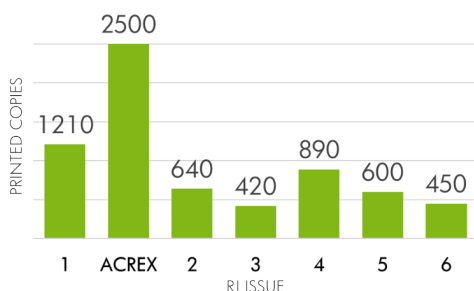

REHVA European HVAC Journal

The REHVA Journal is a **bimonthly technical publication** presenting the latest developments in the European HVAC sector, with specific focus on the energy efficiency and indoor environment of buildings and use of renewable energy sources. The journal provides readers with technical articles and HVAC sector insights written by top European experts, news from the European Union, product information, publications, events and more.

The REHVA Journal offers guidance to professionals willing to learn more about the latest EU policies, innovations and technologies, keeping them updated about topical HVAC sector issues such as:

- Energy efficient products and systems for buildings,
- Implementation of EU directives (EPBD, Ecodesign),
- Nearly Zero Energy Buildings,
- Ventilation and Indoor Environmental Quality,
- Heating and Air Conditioning systems,
- Use of Renewable Energy Sources.
