

EU-Russia exchange on sustainable building policies and measures

Final Conference

Decarbonisation of the building stock in the EU and Russia – the way forward

20 January, 2022

9:00 - 11:30 (Brussels time) / 11:00 – 13:30 (Moscow time)

The Final Conference of the EU-Russia exchange on sustainable building policies and measures will reflect on the entire 3-part workshop series that was carried out throughout the past months, summarise the key takeaways and lessons learned regarding differences and similarities, and foster future collaboration and experience exchange between the key stakeholders. What are effective ways to decarbonise the European and Russian building stock? What are innovative good practices that may become rising trends? How to tackle the lifecycle emissions of buildings and foster a circular construction sector? We invited actors from academia, public, and the private sector to reflect on the promising approaches for the future, and the concrete steps needed to proceed.
