GENERAL INFORMATION

The REHVA Journal is a bimonthly technical publication presenting the latest developments in the European HVAC sector, with specific focus on the energy efficiency and indoor environment of buildings and use of renewable energy sources. The REHVA Journal offers guidance to professionals willing to learn more about the latest EU policies, innovations and technologies, keeping them updated about topical HVAC sector issues such as:

- Energy efficient products and system for buildings
- Implementation of EU directives (EPBD, Energy efficiency, Renovation Wave, Ecodesign)
- Nearly Zero Energy Buildings
- Ventilation and Indoor Environmental Quality
- Heating and Air Conditioning systems
- Use of Renewable Energy Sources

Our readers

Most of the readers of the REHVA European HVAC Journal are top level professionals: practitioners, designers, contractors, authorities and manufacturers, only a minority of the readers have scientific positions.
