

## Proposal for revision of REHVA Guidebook #9 „Hygiene in Air-conditioning systems“

VDI 6022, which formed the basis of this REHVA Guidebook has been further developed.

The standard is widely accepted throughout Europe. Its revision included a harmonization with European Standards, thus allowing its application by all CEN members.

### **Proposal:**

Newly instated working group to commence revision in September 2017.  
Members to be nominated by Germany, Austria, Switzerland, ...

# Drafting of REHVA a Guidebook „Hygiene in drinking-water systems“

This VDI standard gave rise to significant changes for the better in drinking-water installations over the last 15 years.

The topic has been put in the focus of the technical community. Between 15 000 and 20 000 persons have been trained in accordance with this standard which, together with relevant professional qualifications and professional experience, has been accepted as prerequisite for legally stipulated hazard analyses in drinking-water systems in case of legionella contamination.

## **Proposal:**

Newly instated working group to begin drafting the guidebook in summer 2017. Members to be nominated by Germany, Netherlands, ...
