

Update on EU building legislation, EPBD review and standardisation

REHVA Annual meeting & conference 2015
8 May 2015, Riga

Laurent Deleersnyder
Directorate General for Energy
Unit C3, Energy efficiency

2030 framework for climate and energy policies [COM(2014)15 & COM(2014)520] European council of 23-24/10/2014

New governance system + indicators

Better enforcement would close the gap to the 2020 Energy Efficiency target

Primary energy consumption (Gross Inland

	Energy Efficiency Directive 2012/27/EU
30 April 2013	☑ Indicative national energy efficiency targets
5 Dec. 2013	✓ Key decisions on energy efficiency obligations (or alternatives)
1 Jan. 2014	☑ 3% renovation obligation starts
30 April 2014	☑ National Energy Efficiency Action Plans
30 April 2014	☑ Long-term building renovation strategies
5 June 2014	☑ Main transposition deadline
30 June 2015	 Assessment of potential in gas and electricity infrastructure
31 Dec. 2015	 Assessment of potential for district heating and cogeneration

Long term renovation strategies for the mobilisation of investments in buildings

ESTONIA Art.4 (a) **LATVIA** Art.4 (a) Art.4 (e) Art.4 (b) **LITHUANIA** Art.4 (b) Art.4 (e) Art.4 (a) Art.4 (d) Art.4 (c) Art.4 (e) Art.4 (b) Art.4 (d) Art.4 (c) Art.4 (d) Art.4 (c)

Setting of cost-optimal energy performance requirements

Sources: ECOFYS for DG ENER

Towards nearly zero-energy buildings

Updated state of play published in October 2014

- Substantial improvement as compared to the 2013 progress report, both quantitatively and qualitatively
- Most Member States have now set intermediate targets for new buildings and measures to promote refurbishment to NZEB levels
- Remaining issues regarding numerical indicator of primary energy use
- More guidance seems to be still necessary

Calculation methodologies for the energy performance of buildings

Table 1: Overview of missing aspects in the methodologies related to Annex 1 EPBD

Sources: CSTB & TSUS for DG ENER

Standardisation

- Mandate M/480 includes specifications on usability of the set of standards
- Working group set in place under the EPB Committee to enhance interaction between MS and standard writers
- Service contract on example cases about to start
- New version of the overarching standard is expected mid-May with a public enquiry ending in the Autumn 2015
- Full set of EPB standards expected to be available first half of 2016

Common voluntary certification scheme for non-residential buildings

Background EPBD, Article 11(9)

Apply the CEN set of standards to provide a method for comparable for calculating the energy performance of buildings across Europe

Milestones

- "Roll-out study" about to start
- Pilot phase
- Expected roll-out 2016

Energy Union Communication

[COM(2015)80] and European council of 19/03/2015

Where we want to go:

Secure, sustainable, competitive, affordable energy for every European

What this means:

Energy security, solidarity and trust

A fully integrated internal EU-wide energy market
Energy efficiency as an energy source in its own right
Transition to a low-carbon society
Research, innovation and competiveness

How we want to reach it:

Energy efficiency first

Rethink energy efficiency as an energy source in its own right

This means increasing energy efficiency, in particular in the building sector, and promoting an energy-efficient and decarbonized transport sector as well as efficient products.

- 9. In 2015 and 2016, the Commission will **review all relevant energy efficiency legislation**
- 10. The Commission will develop a **Smart Financing for Smart Buildings** initiative to make existing buildings more energy-efficient, facilitating access to existing funding instruments
