Press Release

New RHoss UniPACK-P ranges EXP multipurpose units and reversible heat pumps in R290.

After the preview at MCE, UniPACK-P propane heat pumps and multipurpose units are now available! We are glad to inform you that the [UniPACK-P](#) and [UniPACK-P EXP](#) product ranges, reversible heat pumps and EXP multipurpose units with scroll compressor and R290 natural refrigerant, are now part of the Rhoss offer. Thanks to the introduction of this new product, it is now possible to offer more solutions with natural Fluorine-free refrigerant for new installations, as well as building renovation with integration or **total replacement** of existing heating system, including gas boilers.

The new ranges are available in 11 sizes each, in **T – high efficiency** and **Q – Supersilenced** versions, covering a cooling capacity from around 50 up to 160 kW.

KEY FEATURES

- Optimized design with R290 low GWP (0,02 – AR6) natural gas.
- Optimized configuration and structures:
 - heat pumps with 2 or 4 compressors, single or dual refrigerant circuit depending on the models;
 - multipurpose EXP units with 2 or 4 compressors, dual refrigerant circuit.
- Leak detector, ventilation system and coil protection nets as standard features for total safety with A3 refrigerant.
- High seasonal performances
- Extended operating limits:
 - hot water production up to **72°C**, guaranteeing 65°C of produced hot water even with external air down to -12°C;
 - cold water production from **-10°C** up to 20°C with external air up to 50°C.
- **SIR** – Integrated Rhoss Sequencer, integrated in the units, which includes also the domestic hot water production sequenced management.
- Various options and accessories for units designed with **Plug&Play** logic, with a wide range of pumping groups;

UNIPACK-P ... A step towards a greener and more efficient future!
